Exceptional/ Smart Performance

Powered by top-grade components and technologies, the ASUS Pro Series helps you easily multitask your office work. Models feature Intel® 2nd generation Core™ processors with powerful integrated graphics and support for up to 16GB of DDR3 memory to best handle your workload.

Support USB3.0 and SATA 6.0Gb/s

Experience ultra-fast data transfers at 4.8Gbps with USB 3.0. USB 3.0 transfers data 10X faster and is also backward compatible with USB 2.0 components. Intel® Q67 Chipset natively supports next-generation Serial ATA (SATA) storage interface, this motherboard delivers up to 6.0 Gb/s data transfer rates.

Intel® vPro™

Intel® vPro™ processors offer extensive hardware management. Even with the computer powered off, users can remotely monitor, inspect, update, start up, and turn off hardware components. In the event of a viral infection, vPro™ technology automatically notifies IT staff and isolates the infected computer to keep the virus from spreading.

Trusted Platform Module (TPM) Data Security*

TPM offers a protected and encapsulated microcontroller security chip used for safeguarding internal data structures against real world threats. This ensures that information like keys, passwords and digital certificates remains safe from external attacks, physical theft and other types of intrusion. *Optional

100% Solid State Capacitors for Ultra Reliability

ASUS Pro desktops are made with the world's best motherboards and solid state capacitors. High-quality components provide utmost durability, improved longevity and enhanced thermal performance.

EPU- Up to 40% Energy Saving

The exclusive ASUS EPU chip is the world's first PC energy saving controller, optimizing efficiency by detecting real time CPU loads and saving up to 40% on overall power consumption.

F9 One Key Restore

With the F9 single click, you can use the recovery partition quickly restores your Desktop PC's software to its original working state. (copying your data files and making note of any customized configuration settings before using the system recovery partition are required.)
